

**LITTLE MILTON PARISH COUNCIL**  
**ACTION PLAN**  
**2016-17**

Little Milton Parish Council agreed the following action plan for 2016-17

- The increase in precept of £750 to £11250 was in anticipation of the Parish Council taking on some frontline services from Oxfordshire County Council. A key action point for the Council will be to evaluate those services that meet the limited management resources of the Council and provide a measurable benefit to our residents.
- To manage the Council finances within budget.
- To successfully install three defibrillators within the Parish within the budgeted cost.
- To continue pursue a dialogue with the County Council to mitigate the environmental impact of HGV traffic coming through the village on the A329.
- To work closely with Thames Water to alleviate the flooding threat to the village, particularly outside the school and the Haseley Road.
- To fully consider South Oxfordshire District Council's encouragement for Parish Councils to develop a Neighbourhood Development Plan.
- To support our local Speedwatch group that monitor the speed of traffic through our village.
- To be fully engaged with the relevant bodies to minimise the impact of cuts to the Community Bus service
- To continue to maintain our community assets
- To work closely with our District and County Councillor for the mutual benefit of our residents.
