## Details

The wind today is in a WSW direction and at 11.55 we went out to attempt some gardening and were met by the stench from TTN

Thursday 8th April - from 2.10pm vile TT stink all afternoon

At 8am this morning when I went outside to the bin there was a terrible stench from Tunnel Tech in the garden. We don't often smell anything in our garden as we are quite sheltered. It had gone by 8:15am but was very strong at 8am.

See attached complaint about the odour from above on Saturday 17th April. Disgusting odour at 7:45am apparently.

See attached email complaint about odour from above on a lovely Sunday afternoon. 10/10 apparently.

Just to say the smell this evening 7.30 onwards on the 24 th April is just awful. It is impossible to be outside or have a window open. Worst it been for years.
