Details

Strong smell here at 20.15 on a Saturday evening/ Could someone please confirm if there are any restrictions to TTN operating hours under the terms of their permit ?

Vile TT stench late evening on 6 January

I would like to report the disgusting odour from Tunnel Tech North on the following dates

07-01-18 Afternoon level 2

We detected it here from around 9.15 and it was particularly noxious around 11.30 and has continued throughout the afternoon.

Just stepped out into the garden to be met by TT stench.

Vile sickening TT stink this morning 7 January 8am in my garden, and driving past site, still stinking 9.45am.

I would like to report the disgusting odour from Tunnel Tech North on the following dates

10-01-19 Morning level 3

smell from Tunnel Tech is more noxious than ever this evening, smell is pervading the whole village. Please will you do something to stop this disgusting stench, which has been having a detrimental effect on residents.

Monday 15th January - vile obnoxious TT stink from early morning.

Once again TTN have ruined a nice sunny day. I can only reiterate what others have said - time to get the press involved to highlight the distress that TTN continue to create. also the lack of positive action by BDC.

XXX wanted to report the smell from the above at 12:07 and 1:05pm today.

I have another complaint about TTN. I was walking near the golf course in Austerfield yesterday & smell there was diabolical too. The only reason we didn't get it in Misson was that the wind had changed.

Smell at 1.20 pm on road near factor & going into Newington

I was driving past the Tunnel Tech Site yesterday evening and the stench was absolutely putrid. The stench travelled with me all the way home and the car still stinks this morning. Are you going to do anything about this.

Tuesday 22 Jan - vile obnoxious TT stench from early morning in village & passing site - still stinking 1.15pm

This morning at approx 11.55 the pollution from Tunnel Tech was drifting across towards River Lane but at that time just bearable, however it intensified & at 1.30pm was so unbearable that it was impossible to go outside.

Smell at 1.08 pm outside his house, came and went afterwards also

10:10 outside house - came and went.

We are based at Misson, down the road is the Tunnel tech mushroom plant & the smell today is horrendous. What is being done to reduce this as it is almost impossible to work in it?

Will you please note my complaint that the odour from Tunnel Tech was evident where I live in Misson at 10:05 on Thursday 24 January 2019.

Tunnel Tech odour strongly evident in Misson 09:45 26 January 2019

Vile TT odour Tues 29 Jan in afternoon in to evening.

Vile TT odour driving past site 30 Jan 8.15am.
