

## **MARDEN PLAY SCHEME**

### **16: Infectious and Communicable Diseases**

Our Play Scheme is committed to the health and safety of all children and staff who play, learn and work here. As such, the Play Scheme will take necessary steps to prevent the spread of infection. It will sometimes be necessary to require a poorly child to be collected early from a session or be kept at home while they get better.

In accordance with the procedures set out in the Health, Illness and Emergency policy (Policy 14) parents/carers will be notified immediately if their child has become ill and needs to go home. Poorly children will be comforted, kept safe and under close supervision until they are collected.

If a child has had to go home prematurely due to illness, they should remain at home until they are better for at least 24 hours, or according to the times set out in the table below. If a member of staff becomes ill at work, similar restrictions on their return will apply.

If a child or member of staff becomes ill outside Play Scheme hours, they should notify the Play Scheme as soon as possible. The minimum exclusion periods outlined in the table below will then come into operation.

If any infectious or communicable disease is detected on the Play Scheme's premises, the Play Scheme will inform parents/carers personally in writing as soon as possible. The Play Scheme is committed to sharing as much information as possible about the source of the disease and the steps being taken to remove it. Ofsted will also be informed of any infectious or communicable diseases discovered on the Play Scheme's premises.

#### **(1) Coronavirus (CoVid-19)**

Any member of staff or child who has symptoms must not attend play scheme. They should report to the manager of their absence and not return until they have a clear result.

Masks and hand sanitiser will be made available at the scheme for anyone wishing to use.

#### **(2) Head lice**

When a case of head lice is discovered at the Play Scheme, the situation will be handled carefully and safely. The child concerned will not be isolated from other children, and there is no need for them to be excluded from activities or sessions at the Play Scheme.

When the child concerned is collected, their parent/carer will be informed in a sensitive manner.

Other parents/carers will be informed as quickly as possible in writing, including advice and guidance on treating head lice.

Staff will check themselves regularly for lice and treat whenever necessary.

## (2) Minimum Exclusion Periods for Illness and Disease

<b>DISEASE</b>	<b>PERIOD OF EXCLUSION</b>
Antibiotics prescribed	First 24 hours
Chicken Pox	7 days from when the rash first appeared
Conjunctivitis	24 hours or until the eyes have stopped "weeping"
