### **General Tree Assessment (Summary)**

| Tree Ref  | Species  | H (m) | Spr (m) | Maturity | Condition      | Action Recommendations      | Priority D | one Inspected |  |  |  |
|---|--|-------|---------|----------|----------------|-----------------------------|------------|---------------|--|--|--|
| G1  | A Group  | 15    | 7       | М        | Good           | Remove :: Major dead wood   | 6 Months   | No 28-Oct-22  |  |  |  |
|   | group of approximately 10 mature Oak trees situoad. All displaying deadwood throughout canop AP.                                       |       |         |          |                |                             |            |               |  |  |  |
| 378   | Common Horse Chestnut  | 14    | 7       | ОМ       | Poor           | Pollard :: Re-pollard       | 6 Months   | No 28-Oct-22  |  |  |  |
| Comment: A large Horse Chestnut tree situated in cemetery with graves all around. Historic pollarding has been undertaken and the reactive canopy growth is becoming unstable due to poor attachment and poorly occluded pruning wounds. Bacterial canker prolific and limbs are becoming prone to failure. Tree to be retained but remediation pruning is required. Repollard this winter. |  |       |         |          |                |                             |            |               |  |  |  |
