General Tree Assessment (Summary)

Tree Ref	Species	H (m)	Spr (m)	Maturity	Condition	Action Recommendations	Priority	Done	Inspected
G1	A Group	16	5	M	Dangerous	Fell :: Fell and replant space	6 Months	No	27-Oct-22
Comment: A roadside woodland group of approximately 250 Ash trees of varying size and age class. The majority of these trees are now dead and prone to failure. Consider removal of entire woodland population and replace with a suitable species. Removal advised ASAP.									
G2	A Group	22	5	M	Varied	Fell :: Fell and replant space	3 Months	No	27-Oct-22
Comment: A roadside woodland group of approximately 150 Ash trees of varying size and age class. All displaying canopy decline indicative of Ash Dieback. All within falling distance of the road. The majority of these trees are now dead and are prone to failure. Removal advised ASAP.									
G3	A Group	15	5	M	Dangerous	Fell :: Fell and replant space	3 Months	No	27-Oct-22
Comment: A roadside woodland group of approximately 100 Ash trees of varying size and age class. All displaying canopy decline indicative of Ash Dieback. The majority of these trees are now dead and are situated immediately adjacent to the road. Removal advised ASAP.									
G4	A Group	15	5	M	Poor	Fell :: Fell and replant space	1 year	No	28-Oct-22
Comment: A roadside woodland group of approximately 250 Ash trees of varying size and age class. All displaying canopy decline indicative of Ash Dieback. Consider removal of entire woodland population and replace with a suitable species. Work to ideally be undertaken within the next 1 to 3 years before onset becomes too problematic.

Tree Ref	Species	H (m)	Spr (m)	Maturity	Condition	Action Recommendations	Priority	Done	Inspected
G5	A Group	15	5	M	Poor	Fell :: Fell and replant space	1 year	No	28-Oct-22
Comment: A roadside woodland group of approximately 250 Ash trees of varying size and age class. All displaying canopy decline indicative of Ash Dieback. Consider removal of entire woodland population and replace with a suitable species. Work to ideally be undertaken within the next 1 to 3 years before onset becomes too problematic.									
389	Common Ash	24	7	OM	Fair	Re-inspect :: See Comment	1 year	No	28-Oct-22
Comment: A very large Ash tree situated adjacent to the road and residential properties. Currently fairly healthy but displays canopy decline indicative of Ash Dieback. Major deadwood has been removed and primary limb reduction work has also been undertaken. Reinspect annually to assess onset of Ash Dieback.									
394	Common Oak	14	5	M	Good	Remove :: Major dead wood	1 year	No	28-Oct-22
Comment: A medium sized Oak situated adjacent to pond in an area where people feed ducks. Unlikely to pose risk but deadwood could be removed due to the reasons stated.									
395	Common Oak	10	5	M	Poor	Fell :: Unspecified	1 year	No	28-Oct-22
Comment: A small Oak tree situated adjacent to cricket pavilion. Compression fork with included bark becoming pronounced and cannot feasibly be remediated. No realistic retention value.									
396	Common Ash	5	2	SM	Poor	Re-inspect :: See Comment	1 year	No	28-Oct-22
Comment: A small Ash tree which is currently healthy and not displaying canopy decline indicative of Ash Dieback. Reinspect annually to ascertain whether Ash Dieback is visible.									
399	Common Ash	9	1	OM	Poor	No action :: Unspecified		No	28-Oct-22
Comment: A roadside Ash tree affected by Ash Dieback which has now been felled to a safe height. No action currently required.									
400	Common Ash	6	1	Y	Poor	Fell :: Unspecified	1 year	No	28-Oct-22
Comment: A roadside Ash tree displaying canopy decline indicative of Ash Dieback. Remove within the next year.									
Age Classification: NP Newly planted EM Early Mature Y Young M Mature SM Semi-mature OM Over Mature Condition: Overall unless specified as - C Crown S Stem B Basal area									

Tree Ref	Species	H (m)	Spr (m)	Maturity	Condition	Action Recommendations	Priority	Done	Inspected
401	Common Ash	22	5	OM	Poor	Fell :: Fell to safe height	3 Months	No	28-Oct-22
Comment: A dead woodland Ash tree situated adjacent to footpath displaying canopy decline indicative of Ash Dieback. Fungal fruiting bodies of Inonotus hispidus also visible. Fell to monolith and retain as standing deadwood habitat. Removal advised ASAP.									
402	Common Ash	22	7	OM	Poor	Fell :: Fell to safe height	1 year	No	27-Oct-22
Comment: A large and multi stemmed woodland Ash tree situated adjacent to footpath displaying canopy decline indicative of Ash Dieback. Fungal fruiting bodies of Inonotus hispidus also visible. Fell to monolith and retain as standing deadwood habitat. Removal advised ASAP.									
403	Common Ash	23	7	OM	Poor	Fell :: Fell to safe height	1 year	No	27-Oct-22
Comment: A large woodland Ash tree situated adjacent to footpath (within falling distance) which displaying canopy decline indicative of Ash Dieback. Removal advised ASAP.									
404	Common Ash	25	7	OM	Poor	Fell :: Fell to safe height	1 year	No	27-Oct-22
Comment: A woodland Ash tree situated adjacent to footpath and third party property boundary displaying canopy decline indicative of Ash Dieback. Fungal fruiting bodies of Inonotus hispidus also visible. Fell to monolith and retain as standing deadwood habitat. Removal advised ASAP.									
406	Common Ash	22	8	OM	Poor	Fell :: Fell to ground level	3 Months	No	27-Oct-22
Comment: A large Ash tree situated adjacent to driveway and third party property boundary displaying canopy decline indicative of Ash Dieback. Fungal fruiting bodies of Inonotus hispidus also visible. Removal advised ASAP.									
407	Common Ash	23	9	OM	Fair	Re-inspect :: See Comment	1 year	No	27-Oct-22
Comment: A large Ash tree situated adjacent to driveway and third party property boundary which is beginning to display canopy decline indicative of Ash Dieback Reinspect annually to monitor onset of decline.
