

7.1. TO CONSIDER AND RESOLVE IDEAS CHOSEN FOR FUTURE CIL SPEND

Note from the CIL Chair, Celia Davies:

Dear CIL committee members,

Thank you to you all for contributing ideas for CIL spend over 2020/21.

Please find below the collated list for us to discuss and agree which ideas will be taken forward to share with the local community. Please do read before the next CIL meeting. You might like to consider the ongoing sustainability for each proposal, do they sufficiently benefit the local community and are they appropriate for CIL spend (as opposed to other sources). Do they sufficiently reflect the geography of WPC in the widest sense?

Please note that Cllr, Bowdler has also been in touch re ideas, so whilst not on the CIL committee, his ideas have been included here too.

We will also share this report with the full council who will be invited to comment before or at the next CIL meeting.

Name of Councillor	CIL Idea	Additional Comments/Beneficiaries
Karen Cook	Circular Picnic table and attached benches on the Village Green almost opposite the stores	Already wide use on a regular basis of the table and chairs outside the shop. Could attract more customers to the stores, enable families to socialise. Already spoken to residents who would be most affected with positive results. Made from recycled plastic made to look like wood. Environmentally friendly and no maintenance. Cost approx £700 for the table etc. Cost for laying slabs to provide a flat surface approx £700.

	Refurbishment of fingerposts	Ex Cllr Tratt completed a comprehensive survey of all fingerposts needing refurbishment. East Sussex were providing match funding of 50% - this would need to be confirmed. All parishioners would benefit and preserves a unique feature of the area
	A bench at the far end of the Green from the shop, by the fingerpost	Could attract more customers to the local shop and enable families to socialise
	Replacement of broken and unsafe Millennium bench outside Dunn Village Hall, originally made by Douglas Andrews.	
Andy Long	Replacement of benches on RLG village green that require replacement	
Mike Smythe	Boost Wi-fi in village halls	More attractive for rental and businesses using the hall, fayres etc selling merchandise.
	Provide rubbish bins in areas of need- the Green and in parking areas i.e. north end of Marklye Lane	
	Commission a traffic survey of both villages	To ascertain if the increased flow, weight (HGV's) and speeds of traffic are sustainable with our roads and infrastructure
	Purchase traffic/no parking cones for village events – especially on the Green	Users are asked to regulate parking with no means of doing so – unless they can borrow cones from ESCC
Pauline Velten	A new fence around two sides of the Green by the Village Hall	
	Re-engraving the War Memorial as the lettering has worn away	
Steve Williamson	Electric charging points. BSG village hall car park and possibly RG	Supports the environment within the parish by encouraging the move to cleaner cars
Richard Reading	To purchase two Biochar kilns plus leaflet printing and distribution	Burning unwanted wood and organic waste will turn it into charcoal. Once activated this charcoal is known as biochar and can be added

		to the land or garden with enormous benefits as well as helping to reverse climate change. Furnace Brook will offer free training and this will double up as a community event. The Kilns could be leased out either for free or for a small fee to fund the scheme. 2 Biochar kilns will cost £600
Celia Davies	Warbleton walking routes and cycling routes – promoting public walkways and safe routes with accessibility information and amenities, shops and pubs, picnic areas etc en-route that are in an AONB. Could be published in partnership with ESCC. Could include features on the local natural environment with ancillary content supported by Sussex Wildlife Trust, local RSPB, cycle networks, and Warbleton Wild Flower Group for example.	Promotes health and well-being and outdoor pursuits for residents and visitors. Could have family focus. Encourages respect for and understanding of AONB. Supports local visitor economy, contributes to a thriving local business economy which in turn serves local residents amenities.
	Electric car chargers in each village location	Leads move to cleaner energy use in rural areas
	Petanque on the village green at RLG. Area required would be 4 x 15 m with prepared gravel surface with sub-base. The level area would also be good base for hirers for range of uses. The court could also be an activity at fayres etc.	Encourages people to actively <u>use</u> the green for leisure. Encourages health and well-being, outdoor pursuits through game playing, encourages neighbours/friends to meet up socially, reduces social isolation for those who live alone. Court be booked (through the shop or online or just turn up and use if its free??) kits available to hire with a refundable deposit – same as cost of the set if lost/damaged) or bring your own. Intergenerational activity.
From Cllrs		
Bob Bowdler	Build a brick feature out of the well in Punnett's Town and add a bench to the site	Enhance the street scene and provide additional seating
	Punnetts Town school crossing	With increased building and therefore traffic in the area, the need for a safe crossing between the school, the medical centre, the sports field and the village hall is increasing. It could be a

		joint effort between Heathfield and Warbleton Parish Councils
