

WEST ILSLEY PARISH COUNCIL

Explanation of variances of annual balances that are more than 15%, unless the amount is less than
£200
For year ending 31 March 2020

2. Precept or rates or Levies. This is lower because there was no CIL payment this year, the figure is just the Precept.

3. Total of other receipts. This was increased by VAT reclamations during the last year

6. All other payments. We spent less on village maintenance and improvements this year than last year, though playground maintenance costs are imminent.

7. Balances carried forward. These have increased by spending less than we have received. However this build-up of reserves is necessary given our plans for some expensive village maintenance plans in the near future.
