Corsican Pine
Pinus nigra var.maritima

Tag:

Assessor: Andrew Binks

TPO:

Date: 10-Nov-20

Tree Comment:

Survey Comment: 3 stems from 4.5m which are supporting a significant amount of weight. One limb has a smaller branch infused in it just above the fork. This limb supports the most weight and also on the limb are two lateral limbs extending out by nearly 15m. These are prone to failure in high winds -If the areas usage was to change it would be recommended to reduce the two long laterals by 5m.

Details	Height	Spread	Stems	Ø	Maturity	Bat	Con Area	Prev Insp	Next Due	QTRA Score	Condition

Tree Comment:

Survey Comment: Bark wounding on the main stem from 1m to 8m with good occlusion, also damage on 1 larger limb over the streetlight causing it to fail and rest on the Limb below it. Reduce the lower limbs by 4m and remove the failing limb. Also reduce the limb over the light by 3m and the low limb below this to match. .

		Tree Comment:									
		Survey Comment: There is a significant cavity at 2m that extends to at least 300mm into the stem. The stem diameter at this point is approximately 900mm The full extent up and down is not known. There is a another cavity 3m above this it is not known if they are linked. Further investigation could determine this, allowing recommendations to be made.
