Mileaters walk 11 August 2026

Despite the forecast of high temperatures, 18 walkers/diners and 4 dogs started (and finished) our walk: a gentle 'stroll' through river meadows, heath, forest and along country lanes east of Wool. The strange postbox was of interest at our 'hydration break'. The mud pit which proved quite an obstacle on our previous walk here many years ago was non-existent unsurprisingly. Most walkers were grateful for the rather flat nature of the walk and the shade. Our first choice of pub - the Black Bear in old Wool- had changed hands and no longer served food. The Ship Inn, however, was a revelation to most: great service and good food. The large serving of cheesy chips, however, proved too much for two of our walkers. I suggested they handed them out alongside the road after lunch.
