

HANGING BASKETS

Due to the current corona virus issues many local nurseries are not in operation and I have therefore contacted a more national company that supplies baskets for many councils and have a good name.

This company offers two options-

1. Purchase Option-
50 baskets @ £33.00 each = £1650.00 + delivery fee of £80.00 (this is with a reduction from the normal price of £38.45
2. Rental Option- Baskets supplied and then collected at the end of the season.
Rental price 50 baskets @£33.00 = 1550.00 delivery and collection £500.00

These planters have an integral water reservoir enabling them to go 7 days without watering, this saves money by reducing the number of times your crews have to go out to water them, also reducing the amount of water wasted and the corresponding impact to the environment. All our planters are made from tough and maintenance free, recyclable polyethylene, that does not fade and is resistant to the effects of UV light.

Below are example pictures of their product.

I have reviewed previous files from the office, and it appears that Longacre nurseries supplied the Council with baskets each year.

You may consider due to the time scales to go with the purchase option for this year and then as other Councils do, put the hanging basket out for tender in December 2020 in order to give local companies the options to apply. Hopefully by then we may have returned to some form of normality.

7 DAYS

Specification:

- 430mm x 430mm x 255mm
- Water reservoir capacity 12 litres
- Compost capacity 12 litres
- For chain suspension

REF: PCH17/CONTRACTOR
