Dear Richard.

**Swaffham Climate Action** is a concerned group of volunteers set up recently with two main objectives;

- raise awareness locally about the seriousness of Global Warming;
- suggest possible ways in which owners and occupiers of all premises in the town might reduce their consumption of fossil fuels, assuming of course that action is not being undertaken in this direction already.

Initially we are approaching the managers / responsible persons of the larger premises as these are likely to be significant consumers of gas or fuel oil for heating and operational purposes. Also, following some discussions with elected members from Norfolk County Council and Breckland Council we understand that there will be consultations in the Spring which will include public meetings. Experts on the whole question of Global Warming will be called in to provide the latest information.

**Would you be kind enough to complete, or have the appropriate person complete, the attached form and either email or send it back to us** so we can prepare an overall picture of the situation in the town? Our intention is then to summarise the information obtained (without disclosing individual details) and arrange for further discussions as necessary. **Any data supplied will be kept completely confidential.** We have no connections with any commercial undertakings.

If you receive copies of the Swaffham Newsletter, you will see that we are producing a regular article on the Global Warming situation, including a "Tip of the Month".

Many thanks

Col Abbiss

## Swaffham Climate Action (SCA) – survey of the larger fuel consumers in the town.

Please answer the following:

1. Name of company / organisation.....

2. Address.....  
.....

3. Email.....Phone.....

4. Responsible person for further contact.....

5. Their email.....Phone.....

6. Space heating is provided from energy source:	oil	yes	no (please circle)
	Gas	yes	no
	air source / ground source heat pump	yes	no
	off – peak electricity	yes	no
	on- peak electricity	yes	no

Other – please describe.....

- |   |                                      |     |    |
|---|--------------------------------------|-----|----|
| 7. Hot water etc provided from energy source: | oil                                  | yes | no |
|   | Gas                                  | yes | no |
|   | Air source / ground source heat pump | yes | no |
|   | off – peak electricity               | yes | no |
|   | on – peak electricity                | yes | no |

Other – please describe.....

- |  |     |    |
|--|-----|----|
| 8. Do you consider your premises are well insulated?   | yes | no |
| 9. If no, are you proposing to install further insulation?   | yes | no |
| 10. If you use fossil fuels, would you consider changing / are you already changing to a more climate - friendly heat source?                    | yes | no |
| 11. If no, may we inform you about alternative energy sources and the resulting likely benefits to the environment and savings in running costs? | yes | no |

**For approved installations using alternative energy sources, HM Government will currently refund 7.3 pence per unit of electricity generated under the Renewable Heat Incentive scheme.**

Many thanks for your response. Please return this completed form to James either by mail (see covering letter) or to [jamesdean@uwcdub.net](mailto:jamesdean@uwcdub.net). **All information supplied will be kept confidential. SCA have no connections with any commercial undertakings.**

For queries, please contact either Dr Colin Abbiss (Chairman), 01760 723118, or James Dean (Secretary) 01760 720756.
