Details

Last night the smell coming from Tunnel Tech was disgusting. PLEASE will the Council do something to stop this obnoxious smell.

Odour from tunnel tech whilst out walking today 9.30 am.

No surprise TT smelling again today. We drove past at the plant at around 14.30&it stank from near the quarry to round the Newington corner. Just exactly how long does commissioning take?

See email attached. Odour on 8th but nothing on 7th December.

4.41pm on the road into the village.

4.12pm on road into the village.

How disappointing.... Tunnel Tech is still stinking 10 days after the deadline. I was passing at 7:30pm last night, Thursday 10th Dec and the smell filled my car and was still there 5 minutes later.

Thurs 17 Dec - vile TT stench 9.10am onwards, still stinking at 1.20pm.

Very strong odour from the tech at 1.08 pm Saturday 19th December in fields at back of coronation Ave whilst out walking .

I had the misfortune to drive past TTN this afternoon at 1.00pm and encountered the smell which permeated my car and accompanied me into Misson.

In spite of their "improvements" Tunnel Tech was stinking when we passed it today at 17.30 and still stinking when we passed again at 18.30. You could smell it down Bawtry road towards Misson and into Newington.

There was a bad smell from Tunnel Tech at lunchtime today at the Bawtry Road end of the village. Unpleasant whilst out for a walk.

Smell from TT was pretty bad at 1:30pm on Sunday 20th while walking along Brians Close Lane on the north side of Misson. There has been a noticeable smell driving past the site a couple of times in the past week.

14:15pm road into village

Yesterday 21st December at 1.00pm I drove past TTN and a smell reminiscent of rotten eggs drifted into my car.

Monday 21st December - Tunnel Tech stinking from quarry entrance down Bawtry road, and through Newington. Still stinking on return later. Mid morning to lunchtime.

7:22am Road into the village

Are we to believe that the enclosure works at TTN have been an abject failure. I say this because the stench at Misson Mill this morning was horrendous. Can somebody please advise why we are still getting the smell.

Suffered sporadic outbreaks past 2 weeks but this has been relatively low level&short-lived. However today the stench has been appalling really bad this morning around 8.30am&still hanging around in a diluted form.

Tuesday 22nd December - Tunnel Tech stinking from halfway down Bawtry road, and through Newington at 10.30. Still stinking on return an hour later.

Tues 22 Dec - horrendous TT stench from early morning, lasting most of day.

The smell today has been particularly bad this morning&walking past the factory I have to wonder if the works have been finished like we were led to believe. It looks like polythene windows&even they are torn.

13:25pm Outside his house
