Re: A2 Bean and Ebbsfleet junction improvements – vegetation clearance

Dear Resident,

As part of the A2 Bean and Ebbsfleet junction improvement project, we will be carrying out vegetation clearance around Bean junction, throughout October. These works are required prior to the new bridge that will be installed and the widening of the new slip road. Works around Hope Cottages will start from the 5th October 2020 and complete on the 30th October during both day and night shifts, with lane closures installed for the safety of both our workforce and the road users. We will also be carrying out investigations on Bean South Abutment, which is the wall of the A2 bridge on the London Bound carriageway, from Monday 12th October. This will involve removing some of the existing panels using breakers.

These works will inevitably create some noise. Whilst we will do our best to carry out these works during day-time, some work will need to take place on nights. We will carry out any noisy activities at the beginning of the shift so as to minimise any disruption to local residents.

Please do let me know if you have any questions regarding these works by contacting the scheme stakeholder manager Natalie O'Dwyer at Natalie.O'Dwyer@Balfourbeatty.com or 07971 472517.

Yours sincerely

Tom Bell

Project Director
