

7 December 2025

The success of the recent campaign to save the 'Middleton Oaks' has been a great demonstration that it is, sometimes, possible to make a difference when communities come together to protect something precious. But as you all know, the real issue here is the use of the B1125 as a rat-run (both now and as a legacy) - and Sizewell are refusing to engage meaningfully about this (SZC's own figures show the daily average is now over 4000 vehicles - every day on this winding, rural B-road!)

Sadly common sense and logic are not getting any of us anywhere with this issue (I know large numbers of you on this list have also been badgering the various authorities) - so now, together with a few determined locals, we have formed a B1125 Action Group to specifically focus on safeguarding this access route to our heritage coast.

We need to gather even more support from local people and businesses and we need to get the media interested again because we plan to call on as many people as possible to join another 'event' with more press attendance to make our many voices heard before it is too late. More details of our 'event' will follow in due course.

**In the meantime please note the new email address: [b1125actiongroup@btinternet.com](mailto:b1125actiongroup@btinternet.com) - this will be used from now on for all communications about this campaign, so please make sure this address is known to your email account to avoid messages going into your spam folder!**

I am attaching a new Information Sheet and Maps for you. Please share these with anyone you think might be interested - in particular if you have press/media contacts - please spread the word far & wide and encourage anyone interested to join our Mailing List so that we can contact them as soon as we have more information.

One final request (other than those at the end of the Info Sheet!) - if you attend any of the SZC Forums, might you be happy to offer a short synopsis (*just highlighting any issues relevant to the*

*Middleton Oaks/B1125 Extension/B1125-B1122 Junction, not everything!)* that could be shared to the Mailing List afterwards for those unable to get along?

With many thanks for your continued support,
