

PP – Report From MOD Lyneham

- I have requested better management of the overgrowth of plants etc along the fence line, all areas.
- I am still trying to get some detail on the woodland management, however be advised this sits outside my remit so information is slow in coming. If Stuart could provide me with some evidence of the ‘local backlash’ that would be great, and help me staff this issue on your behalf. However, if this is MOD land, which I assume it is, then it is technically private property, I therefore politely request you manage your expectations accordingly.
- Lighting, SSE who own the cabling have said the power issue to the lighting is not their responsibility (shock!). We are now looking at procuring a solar option, noting the MOD is striving to meet with carbon neutral footprints – more to follow but this will not be quick as I have to find the money.
- A request for the ‘plan’ has been sent to the Lillybrook team regarding the drainage excavation on the north side of MOD site.
