

E-Mail Provision

I have investigated alternative providers for emails.

Namesco (one of the domain registrars I use) do not offer this service.

UK2 offer emails at £1.00 per user per calendar month. This would be in addition to the hosting charges agreed at the last Council meeting.

GoDaddy also offer email at £1.99 per user per calendar month.

There are a number of free email providers such as gmail.com, outlook.com, yahoo but none of these would use the thornhackettpc.org.uk part of the email address.

Some of the free providers also offer business or subscription rates as below

gmail business \$5 per user per month

outlook premium \$69.99 per user per year

Yahoo business \$1.19 per user per month

Titan business \$2 per user per month

None of these options seems to offer a better solution to the one I offered which would be unlimited email addresses AND hosting all for £12 per month.
