	Ensure there is an equipment sign attached.	OK / [REDACTED]	Yes / No
Zipwire 70kg weight not available, best guess using body weight. Slight split starting to show on zip wire seat rubber - Split has not increased in size, will monitor closely	Check the height of the seat is not less than 350mm when laden at approx. 70kg.	[REDACTED] / Issue	[REDACTED] / No
	Checked By: Kevin Barnes	Date: 26/02/23	

- All previous comment extant from last week's inspection
- Wooden large bench - Highly recommend that this is condemned, there are splits in the bench and nails are showing, as per emailed pictures. -what is the route to condemning an item?
- Children Rockers - both rockers handle and foot rests are warn. Nothing to excessive at the moment but will need replacing at some point. Yellow horse rocker -again recommend this is also condemned. The handle grip has Sharp edges to one of the hand grips. Please see photos with the email.
