

## Energy Resilience

Subcommittee meeting held 21 May 2026

Attendees: David White  
Gavin Foster  
George Brogdon  
Malcolm Archer

The purpose of the subcommittee:

1. To investigate what happens to services within the parish in the event of a long power outage, of 24 hours or more, which results in the loss of internet and mobile phones.
2. To identify sites that can provide backup power for mobile phone charging and hot drinks throughout the entire parish.
3. If necessary, assist these sites to get the facilities required and make the public aware that it is available.

Some potential sites were identified. It was agreed to start talks with them to find out whether they are interested and their requirements to enable them to provide the service.
