

Allendale Parish Council proposes a draft budget for the financial year 2026/27. Public comments can be made by email to allendaleparishcouncil@outlook.com, or at the parish council meeting on 8th January 2026 at St Cuthbert's Church Hall, Allendale.

The parish council is proposing a parish precept of £46,000 for 2026-2027, the same figure as last year. The precept is charged to residential properties in the parish and collected with council tax. This precept will allow the parish council to complete some works during the year, while still keeping a sensible reserve in hand.

The budget and the parish precept will be finalised at the January 2026 meeting of the parish council, and the precept figure will be passed to Northumberland County Council in January.

Item	Budget 2025-26	Actual to Nov 30 25	Forecast Dec-Mar 26	Total 2025/26	Budget 2026-27	
Administration

2025-26 (current year) Unbudgeted Expenditure

Allotments Maintenance: Hedge Maintenance cost £1320. In future years regular hedge maintenance will be the responsibility of allotment holders.

Grass cutting and fuel: The council looked for a new contract for grass cutting, which was at a higher cost than originally budgeted.

Bus Shelter: the cost is higher than anticipated but we are expecting partial funding from the North East Combined Area.

Web Site and Email: New regulations mean that we have to make changes to online services this year.

Elections: We have met our share of the election costs for this year. A rebate for part of the charge is anticipated.

2026-27 (next year) Projects and Cost Increases

Bus Shelter: As well as the shelter by Allendale Library for north-bound services (due Dec 2025), the council intends to construct a shelter on the opposite side for south-bound services. This depends on partial funding from the North East Combined Area Bus Service Improvement Plan.

Allenheads Trust: The trust carries out village maintenance and tidying services, and the parish support for this has now been reviewed for the first time in several years. The council has increased the support to £1000 a year.

Grasscutting: Inflationary costs mean increases, but the council has agreed fixed prices for the next two years.

Litter Picking: Costs are linked to the National Minimum Wage which will increase in April.

The parish council intends to use native plants in meadow and woodland areas to improve habitat and environment. This will also reduce grass cutting for part of the season.

Staff costs: These are pegged to a national scale reviewed annually.

Future Reserves

Play Equipment: The parish council directly manages two childrens' play areas and contributes to costs of the Recreation Ground. The Denefields play area is supported from a fund provided by the developer and managed by the parish council. The other play areas may need parish funding when the equipment reaches the end of life.

Mower purchase – the Parish Council owns two ride-on mowers and is accumulating a reserve in anticipation of replacing one or both of these when necessary.

The Headstone Survey is required every 4 years, at an expected cost of £2000, so a reserve is accumulating to meet this cost.

IT Equipment has a finite life so a reserve is accumulating to meet the cost of replacement.

General Reserve is expected to remain at a level that represents a little more than six months operating costs
