New Defibrillators Installed in Chart Sutton

The Parish Council is pleased to inform residents that two new **fully automatic defibrillators (Model CU-SP1)** have now been installed in the village. One unit is located in the cabinet on the side of the **Shop on the Green**, and the second is positioned at the **Village Hall** entrance.

These devices are designed for public use and provide clear voice prompts to guide users through each step. The units automatically analyse heart rhythm and deliver a shock only if required, making them safe for use by anyone, including those with no prior training.

To support accessibility for all residents:

- Both cabinets are available **24 hours a day**.
- Clear instructions are displayed inside each cabinet.
- The devices include **adult and paediatric modes**, ensuring suitability for all ages.
- The locations have been chosen to maximise coverage across the village and ensure quick access in an emergency.

The Parish Council extends its thanks to all those involved in supporting this initiative. We encourage residents to familiarise themselves with the cabinet locations and to call **999 immediately** if a defibrillator is ever required.
