

Personal Data Audit Assessment

- A. To be used to help councils with their record keeping obligations under the GDPR.
- B. This questionnaire is designed to help councils (and parish meetings) to audit their personal data. It is important that councillors and staff complete this form as comprehensively as possible. The purpose of a data audit is to find out what data the council is processing, what it is used for, where it is located and who has access to it. It is an important step in assessing whether there are any risks in the type of processing the council carries out. For example, if the council processes a large amount of sensitive personal data but has no access controls in place restricting who can see or use the data, that is a security risk which needs to be fixed. Without carrying out an audit a council may not know what risks it currently has with data.
- C. The generic phrase "council" has been used to refer to the data controller (see glossary below) using the questionnaire.
- D. Glossary
- **"Personal Data"** is any information about a living person which can identify them. This is not just someone's name and address but any information which can identify them (directly or indirectly). For example, a phone number or email address is personal data. Any other contact information or a person's employment history, or credit history are all personal data.
 - **"Data controller"** is the person or organisation who determines the how and what of data processing.
 - **"Data processor"** is the person or firm that processes the data on behalf of the controller.
 - **"Data subject"** is the person about whom personal data is processed.
 - **"Processing"** personal data means storing or deleting any personal data on a computer, database or some manual files (e.g. HR, allotment tenancy files or invoices with contractor payment details). The word 'processing' also covers selecting a name for a mailing list or reading it off a screen during a call. It includes transferring and altering data. Indeed, practically anything done to personal data constitutes processing.
 - **"Sensitive personal data or special categories of personal data"** are any of the following types of personal data about a data subject: racial or ethnic origin; political opinions; religious beliefs; trade union membership; physical or mental health or condition; sexual life or orientation; genetic data; and biometric data.
