Dear all,

At last, finally and with bated breath no doubt Sam and I managed with the aid of our children supporting us and subsequently testing the Speed Indicator Device on their bikes have erected the SID on the Aldbourne road as agreed.

It is prominent and I have to admit I have witnessed the last two mornings several drivers slowing down before entering the 30mph zone and the cross roads let alone the bridge area.

Early days but it seems to be having a positive effect already.

On this very subject I am of the opinion that we should go ahead and procure another one for the road out of the village towards the A346. At the 'PCs in the pub' a couple of weeks ago, the consistent concern from those who joined us was speeding down that section of road especially after the bus stop and BT exchange lay-by. A resident had lost their cat that week to someone speeding out of the village and it is a regular occurrence, I often wave drivers down to slow down as they see the village gate as a target accelerate significantly before leaving the 30mph zone.

Can we please raise this at the meeting on the 12th of May please and confirm what funds we have in budget?

Kind regards,

Nick
