4	Would fpath promote greater use of community resources	20	91	2	9		
5	Are you in favour of footpath	20	91	2	9		

Comments
Footpath very helpful as it is very dangerous on the road as it is narrow and busy
A 'poo-bag' bin might be a good idea
It will be nice to have a footpath as it is not safe to walk in the main roads, cars go very fast
I think it is an excellent idea
Everything yes, we need a footpath
Needs to be available for disabled and non disabled people
Safety first! A new path would be useful to help keep the exercise up.
Great idea. It would be really useful and help to keep in touch with friends from the other village as a child
A footpath between the two villages is greatly needed. It is very dangerous at present to walk or cycle
Route to be chosen carefully as we sit on very wet ground
A footpath would be great so we can walk to the ightfield playground and not have to go in a car
A foot path would be great and would be so much safer. Also the road to ightfield has so many bends and it's hard to see oncoming traffic. It would also be lovely to ride through the country and not have to worry about traffic.

It is brilliant idea and would join the 2 villages together more by making it safer to walk between ightfield and calverhall
