

**GATWICK AIRPORT
DETAILED MOVEMENT and NIGHT PERIOD ANALYSIS BY AIRLINE OPERATOR
JANUARY 2026**

Appended below is my regular monthly detailed report summarising both the daily movements at Gatwick and details of actual night period movements by airline for the month of January 2026. These are recorded from official data each day online on The Original Gatwick Spotters List. There are also further tables presented which will help one to assess underlying trends. The annual movements and passenger numbers (since 2006) as provided to members of NATMAG (the Noise & Track Monitoring Advisory Group) which meets quarterly now includes the 2025 numbers.

Gatwick's traffic continues to decline both year on year and in relation to its pre-Covid levels with the average daily movements in January at 503 (it was 634 in December) and once again we see the number of movements being lower not only as against pre-Covid (January 2020) but also as against 2025. In 2020, the average daily movements in January were 602 and in 2025 were 530 – so the recovery as against 2020 was down to 83.5% and it was still at 94.8% of last year's January movements. The table in **Appendix 1A** illustrates this continuing steady decline month on month. As to Night Movements, full details for the month are, as always, provided and, notably, despite the significantly lower number of flights compared to pre-Covid, there continues to be an increase in arrivals at night and particularly in the Core Night Period.

It is hoped that these analyses will also assist in making informed representations in regard to the current regulatory consultations and committees including the impact of airspace changes and the future review of the night flight regime. We obviously now await the outcome of the judicial reviews of the Secretary of State's decision on Gatwick's expansion project. Given the decline in traffic, Gatwick's future growth projections in its DCO application should perhaps be revisited, not least given the country's ongoing economic issues and the proposed (and actual) growth in traffic at other airports in the London and South East area, which could be taking traffic away from Gatwick. But it is the Summer season, which commences at the end of March, that will determine whether the decline in traffic will be reversed although a number of new operators have already been announced.

Overall Summary of Movements.

Appendix 1 shows the numbers of movements each week since July 2021 which illustrates the significant reductions in movements from the peak of the summer season as well as, as mentioned above, the fact that overall the numbers of movements in the month were 5.2% lower than in January 2025. **Appendix 1A** illustrates the 2026 monthly figures as against both the last two years and pre-Covid.

Appendix 2 shows a daily movement count for each airline. The assumption last month that the Newquay service had ceased proved to be a false alarm. While officially now operated by Skybus, in practice it is using aircraft hired in from a small Maltese company and usually operates under an Aurigny flight number. The general reduction in services in January is illustrated by there being no services by the Turkish carriers, Corendon and Freebird and minimal services by Sun Express. The Spanish airline, Volotea also had no services beyond the first week but the most notable reduction was with the main airline operator, EasyJet – which in December averaged about 340 movements a day but was operating an average of less than half that in the second half of January, including a low of 108 services on the 27th.

A new carrier was mentioned last month, Qanot Sharq Airlines as commencing two services a week from Uzbekistan; however this appears to have ceased after just two weeks! Nothing else of specific interest this month and, as mentioned above, we need to wait until the end of March to see what changes are likely with Air France, the German Condor and Air Arabia all commencing operations and with Jet2 now basing aircraft here for the first time.

Comparisons with pre-Covid and post-Covid 'recovery' years.

While there have been, as previous reports related, some significant operator changes between pre-Covid and today, the overall mix is not dissimilar with still a heavy concentration on short-haul low-fare European flights; hence we no longer publish detailed pre-Covid information but simply extract the summarised numbers. Details are always available on request.

Looking at total movements for equivalent four weeks, we see this for January:

	2020	2024	2025	2026	Net Recovery 2020/2026
Week One	5060	4569	4890	4760	94.1%
Week Two	4320	3487	3687	3609	83.5%
Week Three	3955	3207	3345	3252	82.2%
Week Four	3978	3372	3462	3247	81.6%
Totals [4 weeks]	17313	14635	15384	14868	85.9%
Totals [full month]	18667	15664	16444	15596	83.5%

The overall traffic recovery levels from pre-Covid in the month can be seen to have materially declined to just 83.5% and indeed lower week on week – they were also down just over 5% in comparison with January 2025.

Analysis of Night Period Flights

Appendix 3 below provides details of all movements by airline and by time during the Night Period from 2300 to 0659; including the 'core' period of 2330 to 0559 where the numbers of movements are, at least in theory, subject to regulatory capping (there remains controversy as to a number of mechanisms which allow flights in excess of the cap).

In the period from 2300 to 0659; the hourly figures (half-hourly for 2300 and wef 0500) were as follows for January 2026 (December 2025 in brackets):

	Arrivals	Departures
2300-2329	124 (212)	9 (13)
2330-2359	86 (107)	4 (4)
0000-0059	72 (71)	3 (3)
0100-0159	49 (62)	2 (2)
0200-0259	43 (48)	0 (3)
0300-0359	21 (26)	0 (0)
0400-0459	33 (32)	0 (2)
0500-0529	61 (64)	6 (2)
0530-0559	66 (77)	48 (61)
0600-0629	120 (113)	215 (339)
0630-0659	123 (139)	199 (344)
Totals	798 (951)	486 (773)
Core Period	431 (487)	63 (77)

With the increase in December's movements leading up to Christmas, night arrivals in January are inevitably lower, with the average number per night being just under 26, in comparison with December's average of just under 31. Similarly, in relation to the core Night Period (2330-0559), December's arrivals were a little lower at 13.9 per night (compared to December's 15.7).

As regards Night Period departures, there was a reduced average of 15.7 per night in comparison with December's 24.9 but only a modest reduction in the core night period at just over 2 per night compared with December's 2.5 per night.

We also compare Night Movements for the current month with their equivalent in January 2020, January 2024 and January 2025.

January	Arrivals				Departures			
	2020	2024	2025	2026	2020	2024	2025	2026
2300-2329	162	130	117	124	30	10	13	9
2330-2359	71	84	78	86	3	3	9	4
0000-0059	34	92	70	72	5	10	5	3
0100-0159	13	48	57	49	2	4	2	2
0200-0259	20	16	43	43	2	1	1	0
0300-0359	16	17	12	21	1	0	0	0
0400-0459	24	21	42	33	0	0	0	0
0500-0529	52	19	44	61	4	0	0	6
0530-0559	78	55	68	66	23	35	38	48
0600-0629	138	97	107	120	166	205	251	215
0630-0659	136	122	103	123	266	222	234	199
Totals	744	701	751	798	502	490	553	486
Core Night	308	352	424	431	40	53	55	63

The key comparison in what is happening in night period movements at Gatwick is not the numbers compared to the previous month but the changes in relation to previous years. Again this month, we see that despite the overall number of movements being significantly lower than in 2020, core night arrivals are some 40% higher and departures 57% higher. The two clear trends from the pre-Covid period are the increased arrivals in the small hours and the increase in early morning departures – both predominantly by the low-cost carriers. At the recent Gatwick NATMAG meeting, a proposed plan was announced of encouraging the long-haul airlines to delay their often early arrivals so as to avoid the core night period. We will see how this works and its impact on future statistics.

Note: The January/February 2019 figures are actually for 2020 – ie pre-Covid lock-down.

Appendix 1B GATWICK ANNUAL MOVEMENTS TABLE
(As published at NATMAG)

Year	No of Movements	Passenger Numbers	Average Passenger Load Factors
2006	263,371	34,384,000	130
2007	266,540	35,200,000	132
2008	263,716	34,100,000	139
2009	251,714	32,370,000	128
2010	240,462	31,353,547	130
2011	251,019	33,660,146	134
2012	246,792	34,222,461	139
2013	250,527	35,447,009	141
2014	259,974	38,127,700	147
2015	267,777	40,267,938	150
2016	280,089	43,130,800	154
2017	286,271	45,561,700	159
2018	283,926	46,075,410	162
2019	284,736	46,573,796	164
2020	79,310	10,166,916	128
2021	55,225	6,254,549	113
2022	217,524	32,838,015	151
2023	256,831	40,895,000	159
2024	265,319	43,247,000	163
2025	263,049		

Note: The number of movements quoted herein vary slightly from those in Appendix 1A due to differing sources; such differences are, however, not material. At the recent NATMAG meeting referred to, Gatwick's own numbers for 2025 were referenced and seemingly confirmed the overall reductions in both movements and passenger numbers. These figures are expected to be officially released shortly.

**APPENDIX 2 GATWICK MOVEMENTS
