All prices quoted exclude V.A.T.

Stainless Steel Plagues

Stainless steel plaques do not tarnish, so inscriptions remain legible and the plaque looks good for an extended period.

Bronze Plaques (Not for Oak Seats)

Atmospheric conditions will cause the bronze to mature to a dark brown colour.

Brass Plaques (Not for Oak Seats)

Brass plaques tarnish quickly and can acquire a greenish colour.

Delivery - After you have received your order confirmation, delivery will follow in approximately 3-6 working weeks, although this may be extended at certain times of the year. All goods are delivered with full assembly and installation instructions, and items delivered unassembled come with all necessary fastenings and the special keys required. It is the customer's responsibility to ensure that there is suitable access for delivery vehicles to off-load points. **Delivery excludes off-loading, however our driver will assist where possible**. The delivery will be made by a singular operative so suitable manpower will need to be available for off-loading and moving to desired location. Customers are always phoned in advance of delivery to make the necessary arrangements.

This quotation is valid until 31st December 2019. We are currently reviewing our prices and will be issuing a new price list as of 1st January 2020.

We would be prepared to supply these goods to you on an account basis, with our invoice payable within 28 days. If a contractor purchased these goods on your behalf, we would require payment against a Pro-Forma invoice.

Seasoned European Oak is more prone to splitting, shaking, surface checking and warping than our standard timber, Iroko. These characteristics, which are an inherent quality of this timber and are beyond our control, are most likely to occur on the larger sections. It also has a number of small knots in it, so is not as 'clear' as Iroko. High build coatings are more likely to lift and peel on European Oak, so we finish products made from this material in a dark oak spirit based matt wood stain, which cannot lift or peel. We do not recommend the application of high build coatings on Seasoned European Oak. The condition of seats and picnic units, in particular, should be reviewed after approximately six months, and any areas of raised grain briefly sanded down with fine sandpaper. If the units are re-stained at this stage it will improve their appearance. The stain is inexpensive, quick and easy to apply, and can be supplied when the items are delivered, if required.

Where **FSC 100%** is shown, 100% of the volume of the timber used in the manufacture of the product is certified in accordance with TT-COC-002310
