

**GATWICK AIRPORT  
DETAILED MOVEMENT and NIGHT PERIOD ANALYSIS BY AIRLINE OPERATOR  
FEBRUARY 2026**

Appended below is my regular monthly detailed report summarising both the daily movements at Gatwick and details of actual night period movements by airline for the month of February 2026. These are recorded from official data each day online on The Original Gatwick Spotters List. There are also further tables presented which will help one to assess underlying trends and include the annual movements and passenger numbers (since 2006) as provided to members of NATMAG (the Noise & Track Monitoring Advisory Group) now with the 2025 numbers. It is interesting to note that both passenger and movement numbers were significantly lower last year than in each of the years 2016 to 2019 and also down in respect of 2024.

This Report shows that Gatwick's traffic continues to decline both year on year and in relation to its pre-Covid levels with the average daily movements in February at 596 and once again we see the number of movements being lower not only as against pre-Covid but also as against 2025. In 2019, the average daily movements in February were 713 and in 2025 were 624 – so the recovery level as against 2019 was 83.6% (virtually the same as last month) and it was still down at 95.5% of last year's February's movements. The table in **Appendix 1A** illustrates this continuing steady decline month on month. As to Night Movements, full details for the month are, as always, provided and, notably, despite the significantly lower number of flights compared to pre-Covid, there continues to be an increase in arrivals at night in the 'small hours' and also early morning departures.

It is hoped that these analyses will also assist in making informed representations in regard to the current and future regulatory consultations and committees including the impact of airspace changes and the future deferred review of the night flight regime. We obviously now await the outcome of the judicial reviews of the Secretary of State's decision on Gatwick's expansion project which may be published in the coming month. Given the clear evidence of a decline in traffic in comparison with pre-Covid (and indeed in comparison with last year), Gatwick's future growth projections in its DCO application should perhaps be revisited, not least given the country's ongoing economic issues and the proposed (and actual) growth in traffic at other airports in the London and South East area, which could be taking traffic away from Gatwick. Heathrow's expansion is still uncertain but if it went ahead would undoubtedly make a further serious impact on Gatwick's traffic. But in the short-term, as recorded last month it is the Summer season, which commences at the end of March, that will determine whether the decline in traffic will be reversed with a number of new operators having been announced.

**Overall Summary of Movements.**

**Appendix 1** shows the numbers of movements each week since July 2021 which illustrates the significant reductions in movements from the peak of the summer season as well as, as mentioned above, the fact that overall the numbers of movements in the month were 4.5% lower than in February 2025. **Appendix 1A** illustrates the 2026 monthly figures as against both the last two years and pre-Covid.

**Appendix 2** shows a daily movement count for each airline. While last month we mentioned that the Newquay service had not ceased, it has been announced that the subsidy for this service has been withdrawn and thus it will cease next month. While we have not seen any specific announcements, the schedule shows that Gulf Air, Uganda Airlines and Sierra Leone Airways appear to have ceased their Gatwick operations in the month. And, in comparison with last year, we note that WizzAir are only operating about 50% of what they were, although EasyJet are now back to around the same levels as last year.

Emirates commenced their 4<sup>th</sup> daily service in the month – but it arrives late evening and departs around midnight. At least it did until the Iranian conflict put a hold on much of the Middle East traffic on the last day of the month.

Nothing else of specific interest this month and, as mentioned previously, we need to wait until the end of March to see what changes are likely with Air France, the German Condor and Air Arabia all announcing the commencement of 'summer' services and with Jet2 now basing aircraft here for the first time.

**Comparisons with pre-Covid and post-Covid 'recovery' years.**

While there have been, as previous reports related, some significant operator changes between pre-Covid and today, the overall mix is not dissimilar with still a heavy concentration on short-haul low-fare European flights; hence we no longer publish detailed pre-Covid information but simply extract the summarised numbers. Details are always available on request.

Looking at total movements for equivalent four weeks, we see this for February:

	<b>2019</b>	<b>2024</b>	<b>2025</b>	<b>2026</b>	<b>Net Recovery 2019/2026</b>
Week One	4834	3473	3947	3566	73.8%
Week Two	5048	4132	4438	4202	83.2%
Week Three	5132	4587	4767	4579	89.2%
Week Four	5077	4370	4524	4421	87.1%
Totals [4 weeks]	20091	16562	17676	16768	83.5%
Totals [full month]	19967	17032	17477	16688	83.6%

\*2024 adjusted to reflect leap year

The overall traffic recovery levels from pre-Covid in the month can be seen to have continued the decline highlighted last month with a very similar reduction to 83.6% of the 2019 movements – they were also down by about 4.5% in comparison with February 2025.

## Analysis of Night Period Flights

**Appendix 3** below provides details of all movements by airline and by time during the Night Period from 2300 to 0659; including the 'core' period of 2330 to 0559 where the numbers of movements are, at least in theory, subject to regulatory capping (there remains controversy as to a number of mechanisms which allow flights in excess of the cap).

In the period from 2300 to 0659; the hourly figures (half-hourly for 2300 and wef 0500) were as follows for February 2026 (January 2026 in brackets):

	<b>Arrivals</b>	<b>Departures</b>
2300-2329	139 (124)	6 (9)
2330-2359	89 (86)	11 (4)
0000-0059	86 (72)	13 (3)
0100-0159	48 (49)	1 (2)
0200-0259	43 (43)	1 (0)
0300-0359	17 (21)	0 (0)
0400-0459	37 (33)	0 (0)
0500-0529	57 (61)	4 (6)
0530-0559	73 (66)	50 (48)
0600-0629	102 (120)	261 (215)
0630-0659	123 (123)	261 (199)
<b>Totals</b>	<b>814 (798)</b>	<b>608 (486)</b>
<b>Core Period</b>	<b>450 (431)</b>	<b>80 (63)</b>

Notwithstanding the overall increase in movements in February, night arrivals were only a little higher, with the average number per night being just over 29, in comparison with January's average of just under 26. Similarly, in relation to the core Night Period (2330-0559), February's arrivals were a little higher at 16.1 per night (compared to January's 13.9).

As regards Night Period departures, these were somewhat higher with an average of 21.7 per night in comparison with January's 15.7 with an increase in the core night period at 2.9 per night compared with January's 2.0 per night. A significant change was Emirates newly-introduced 4<sup>th</sup> daily service which arrives mid to late evening and generally departs at or after midnight.

We also compare Night Movements for the current month with their equivalent in February 2020, February 2024 and February 2025.

<b>February</b>	<b>Arrivals</b>				<b>Departures</b>			
	<b>2020</b>	<b>2024</b>	<b>2025</b>	<b>2026</b>	<b>2020</b>	<b>2024</b>	<b>2025</b>	<b>2026</b>
2300-2329	214	179	156	139	32	4	4	6
2330-2359	122	120	53	89	11	1	0	11
0000-0059	78	114	55	86	6	3	2	13
0100-0159	27	46	48	48	2	0	2	1
0200-0259	28	6	40	43	1	1	0	1
0300-0359	15	15	11	17	2	2	0	0
0400-0459	17	22	40	37	2	0	0	0
0500-0529	59	25	43	57	3	0	0	4
0530-0559	34	47	52	73	21	44	45	50
0600-0629	117	101	92	102	146	228	273	261
0630-0659	124	105	105	123	279	283	294	261
<b>Totals</b>	<b>835</b>	<b>780</b>	<b>695</b>	<b>814</b>	<b>505</b>	<b>566</b>	<b>620</b>	<b>608</b>
<b>Core Night</b>	<b>380</b>	<b>395</b>	<b>342</b>	<b>450</b>	<b>48</b>	<b>51</b>	<b>49</b>	<b>80</b>

As mentioned in previous reports, the key comparison in what is happening in night period movements at Gatwick is not the numbers compared to the previous month but the changes in relation to previous years. Again this month, we see that despite the overall number of movements being significantly lower than in 2020, core night arrivals are some 18% higher and departures 67% higher. The two clear trends from the pre-Covid period continue to be the increased arrivals in the small hours and the increase in early morning departures – both predominantly by the low-cost carriers. The recent announcement of a plan to encourage the long-haul airlines to delay their often early arrivals so as to avoid the core night period will hopefully kick in shortly and we will monitor its impact on future statistics.
