Hearing loop – Mrs Godfrey is still collecting information

Baffling/sound insulation – the FO had circulated the information received and had spoken to the firm – positioning is not too important, It's the amount of panelling – it absorbs the sound, pictures etc over it stops the absorption. The firm suggested that as well as suspended panels we could put them lengthways above the radiators

Some samples are on their way, for the next meeting – put on the next agenda

Chairs and tables – the clerk informed the PC that the table had been ordered, but the chairs only enquired about as we had found slightly better chairs, at a dearer price amongst the information other Cllrs had given us. Agreed to go with the original selection, could order 4 different ones later - agreed on Grey
