Comment	<p>We note that according to Policy SD4/SS - item 4 any growth on the Scarp Slope should “deliver multiple benefits through ecosystem services”. As a Policy this is very vague and in our view needs further clarification. What are the practical implications for (as examples) a new farm building, a tourist holiday cottage or an affordable housing scheme on a rural exception site?</p>

What improvements or changes do you suggest?

Add a clause explaining the practical implications of Policy SD4/SS-4 for examples such as a new farm building, a tourist holiday cottage or an affordable housing scheme on a rural exception site.
