

Malthouse Open Space Item 6

Good Afternoon,

Further to my email below, we have reviewed the management plan and request the following details to be included...

Additional information that should be included/would be relevant:

- Grass mowing – additional detail required to include a plan outlining the areas to be close mown, and the areas to be managed for wildflower. Specification to be included for mowing operations to include mowing height and regime for wildflower management (cut and collect assumed, where would arisings be removed to etc).
- Trees – clarity on responsibility for inspections of the trees on site to be included. Are these to remain under the inspection programme of BDBC, or will the Parish be responsible for them as part of the licence arrangement?
- Hedges – additional detail required to advise the height and width the hedges will be maintained to.
- Footpaths are mentioned in the site description, which also refers to a right of way. Information should be included about how these are to be inspected and maintained.
- It is unclear from the document who has liability for the boundary treatments referred to around the open space. This should be explained, with any planned inspections or maintenance for any of them by the Parish Council included in the document.

Once the additional information has been received, we can provide further comments.
