Introduction to Vulcan Ellis Ltd

Vulcan Ellis is a privately owned main contractor with a wealth of experience in delivering commercial, residential and heritage projects.

Vulcan Ellis prides itself by having a proactive, flexible, and personal approach to every project, facilitating us to take full responsibility of the project from inception right through to completion. By offering a hands-on approach for the duration of the contract.

Introduction to The Almonry

The Almonry is a Grade II Listed building, dating back to 1090.

The proposed works are to restore and repair the existing roof, external walls, and windows.

Internally will include reconfiguring the existing layout and in particular restoring the original features and finishes which include lathe and plaster and timber panelling.

The project will bring the building up to current Health & Safety standards. This will ensure the building is accessible for staff, residents, and visitors.

Our works are due to be complete at the end of August 2021.

Current Site Activities & Notifications

We have recently taken possession of the site and are undertaking some enabling works to include site set up and internal strip out.

As part of the works, we will be erecting an external scaffold to provide access to both the roof and the external walls which will be situated around the perimeter of The Almonry. To ensure optimum safety of the public and local community we will be erecting a timber hoarding to enclose the scaffold, which will result in a footpath closure to the section of the High Street directly outside The Almonry.

The hoarding and adjacent to it will be sufficiently lit with adequate signage in place for the duration of the works.

We politely request that all stakeholders are mindful of road traffic safety when needing to cross the road. If you require any assistance with this at any time during the works, we will happily assist where we can and we apologise for any inconvenience caused.
