

Hi David

I agree with your documents in principle with a couple of comments .

The size of gardens should be appropriate to the size of the property rather than large – Housing association and social housing do not want large gardens

Size of Houses – rather than specifying 1,2,3 beds – Could this read “ adaptable to allow all ages to live and stay in the villages following lifetime homes guidelines “

Life time homes are designed for flexible living whilst allowing for sufficient bedrooms for children in younger families but allowing adaption to studies or workplaces or even wetrooms as people age .  
Reducing the need to move

Regards

Gordon

Dear all

Please find attached a draft note of our meeting on 15 August.

Also attached is a draft vision statement, based on earlier correspondence and our discussion at the meeting. As we agreed, please let me have any suggestions for amendment, and I will aim to circulate a revised draft at the end of the month.

The vision statement will need to be amplified by more specific objectives, and using the form that Sharon sent us, I have marked a few suggestions for objectives that we might consider which are specific to Awbridge. It would be good if others could comment and add their ideas by the end of the month, so that I can collate and circulate them.

Best wishes

David
