

# Abdon District Community Wildlife Group

## Survey Results 2021: Curlew (all records)

Survey Area: 16 tetrads (2x2 km squares on the OS National Grid) in 10km Squares SO58 & SO68

### Curlew Records

Each dot represents one or two Curlews seen or heard on one of the surveys, and indicates a likely breeding territory. Arrows show Curlews in flight, not seen to land

- First survey (up to 11 April)
- Second survey (up to 2 May)
- Third survey (5-20 June)

Hatched dots are casual records (birds seen or heard, but not during a survey), and arrows are Curlews in flight, coloured to reflect the (approx.) survey period

- Nest found
- Nest site defended
